Relevant Experience

Frontend Developer, **PrimeIT**   March 2024 - Present

- Hired by PrimeIT, but working with one of Spain's largest car rental companies. My responsibilities include developing their new website, built from scratch using TailwindCSS, and maintaining their three web applications used at a European level.

Frontend Team Leader, **PlattesGroup**   March 2023 - Feb 2024
Full Stack Developer   January 2022 - February 2023
Junior Full Stack Developer   September - December 2021

- Led the frontend team in developing a real estate management platform from the ground up using NextJS and TailwindCSS.
- Provided ongoing support for other created platforms.
- Developed a DMS platform from scratch using React and Vite, with integration to support the Zoho Creator-based accounting platform.
- Developed a Zoho Creator-based accounting platform from scratch, seamlessly integrating and mapping accounting data to DATEV for enhanced efficiency.
- Development of internal APIs in .NET with C#.
- Creation of relational databases in Microsoft SSMS.

Junior Full Stack Developer, **Juniper**   June - August 2021

- Identified and rectified vulnerabilities within the enhancement team and specialized in addressing critical issues such as SQL injection.
- Played a pivotal role in the smooth translation of code from VB to C#.
- Ensured continued robustness and compatibility of the software.
